09 Assets and contacts

01 Logo system

Meko is a YugabyteDB product, not an independent brand. The endorsement is the default; the monogram is the only sanctioned exception.

VARIANTS

Endorsed — light background

Default on white and light grounds.

Endorsed — dark background

Default on black and dark grounds.

Mono black

Single-colour print, embossing, one-ink contexts.

Mono white

Knockout on photography or dark texture.

All four lockups carry the endorsement. Only the monogram omits it.

MONOGRAM — THE ENDORSEMENT EXCEPTION

purple

black

Shown with the platform corner mask applied. Ship the artwork square and full-bleed — never bake in the radius.

> **Rename the source files.** `Meko_Logo_Color-Lght-Bkg` and `Color-Drk-Bkg` imply the orange belongs to Meko. It doesn't. Use `Endorsed` and `Mono`.

MINIMUM SIZES

MEDIUM	ENDORSED LOCKUP MINIMUM	BELOW THAT
Screen	`180 px wide`	Monogram
Print	`45 mm wide`	Monogram

The "By yugabyteDB" line is 13.7% of the lockup's height and 5.9% of its width, measured with descenders. Round up, never down.

RULES

The wordmark is artwork, never type	Custom lettering, not Bloka. Never retype "meko". Never extend the monogram by setting other letters. Always place the supplied files.
Clear space	Equal to the height of the wordmark's `m` on all sides. No text, rules, texture detail or partner marks enter it.
Placement on texture	The logo sits in the image's clear zone, never over the busy area. See imagery direction.
Monogram construction	The wordmark's own `m`, optically centred, side padding at 16.5% of the canvas. Correct as drawn — don't redraw or re-centre.

Retyped in Bloka the wordmark looks *almost* right. That is why it is the most likely error in this document.

02 Color

Purple is the primary. Green is reserved for one job. Orange is inherited from YugabyteDB and is not ours to use.

MEKO PALETTE

Purple
#7859fe

Primary. Type, links, active states, accents.

Purple mid
#5f46cd

Solid fills carrying white text.

Purple deep
#20154f

Grounds and backgrounds. Takes white text.

Green
#51d977

Machine voice only. Dark grounds only.

Brand black
#121017

Panels and cards — anything sitting on top of something.

Page black
#000000

Page canvas, full-bleed grounds, base layer behind imagery.

White
#ffffff

Knockout logo, body text on dark, light grounds.

INHERITED — YUGABYTEDB

Orange

`#ff5f3b`

Endorsement lockup only.

> **The rule:** orange appears only where it already appears — the YugabyteDB mark inside the endorsement. Never a Meko fill, accent, link, button or background. A layout that needs warmth is a request to extend the Meko palette, not permission to borrow the parent's.

CONTRAST

PAIR	RATIO	VERDICT
`#7859fe` on `#ffffff`	4.51:1	AA body — no margin
`#7859fe` on `#000000`	4.66:1	AA body — no margin
`#51d977` on `#000000`	11.54:1	AA body
`#51d977` on `#ffffff`	1.82:1	Never
`#ff5f3b` on `#ffffff`	3.02:1	Large only — limits endorsement size on light

Purple clears 4.5:1 by almost nothing. Don't tint it, don't drop it below body size, and re-test after CMYK conversion. Purple and green never sit on each other — always a neutral between them.

GRADIENTS

The gradient is defined by its **axis**, not its hues: 135°, light at top-left to dark at bottom-right. Both app icons use this construction with different colours.

GRADIENT	STOPS	ANGLE
Purple	`#7859fe` → `#4a35a2` → `#20154f`	135°
Black	`#000000` → `#17161b` → `#4b4754`	135°

> **Boundary:** gradients are for expressive surfaces only — icons, full-bleed grounds, key art. Everything functional stays flat: type, UI, cards, buttons, borders.

03 Typography

Three faces, three jobs. Bloka is the only licensed face and appears in titles only.

BLOKA

Foundry	Digitype Studio — `digitypestudio.com`
Designer	Yusuf Niki Syahroni
Version	`1.000 (2022)`
Licence	Commercial. Confirm whether contracted agencies are covered or must licence separately.
Family	9 weights, 100–900, each with an italic. 351 glyphs per style.
Embedding	`fsType 0` — document embedding and subsetting permitted. Web `@font-face` use is governed by the Digitype EULA, so it stays out of this file.

BLOKA — TITLES — OUTLINED VECTOR, NOT LIVE FONT

SHARED CONTEXT

Aa Aa Aa **Aa** **Aa**

400 regular 500 medium 600 semibold 700 bold 900 black

Uppercase, tight tracking — the site H1 runs at `-1.8px` at 80px. Scale the SVGs to resize a specimen; never swap one for live type.

INTER — BODY AND UI

Meko is a data-persistence platform for hybrid teams of agents and humans, delivered over a remote MCP endpoint. It keeps shared context in one place, so you don’t stitch together your own vector store, graph store, RAG pipeline, relational database and object store.

Aa Aa **Aa** **Aa**

400 500 **600** **700**

Open licensed. Load every weight in use — 600 is currently synthesised.

ROBOTO MONO — CODE AND MACHINE VOICE

```
› where were we?
```

Code, MCP endpoints, terminal output, agent responses. Apache 2.0.

BRAND SUBSET — THREE OF EIGHTEEN STYLES

WEIGHT	USE
`400 regular`	Large display lines where Bold reads too heavy.
`600 semibold`	Section headings. Load the file rather than letting the browser fake it.
`700 bold`	Primary headline weight, uppercase, tracked tight.

Thin through Light disappear at headline scale on dark. ExtraBold and Black add nothing next to Bold. **Italics are not part of the system.**

THE MACHINE VOICE

Mono type plus `#51d977` on a dark ground is **one device, not two rules**: it marks something as machine-spoken — a command, a returned value, an agent's output. Used separately and decoratively, neither signals anything.

Bloka and Inter carry the human voice. Mono and green carry the system's. Keep that division intact.

RETIRED

Roobert and **Albert Sans** are out of the system. Strip Roobert from the theme — it sets roughly 35 elements on the homepage and removing it drops a paid, non-transferable licence from the stack.

04 Imagery direction

Specified as a treatment, not as files. Any image meeting the rules below is compliant, so assets can be swapped without redoing layouts.

The clear zone is not empty space. It is what the negative space is *for* — it holds the logo at full contrast.

ATTRIBUTE	RULE
Ground	`#000000`. The image sits on and dissolves into pure black.
Palette	Cool only — blues, violets, lilacs, white. Fine warm speckle acceptable as incidental detail.
Form	Fluid, marbled, organic flow. Not geometric, gridded, 3D-rendered or photographic.
Composition	At least 40% of the frame stays clear near-black on one side — left by default. Texture bleeds off the opposite edge. Never centred, never uniformly busy.
Clear zone	Must hold the wordmark or monogram at full contrast.
Prohibited	Warm-dominant palettes, recognisable objects, faces, text, and any use inside the logo or lockup.

> **Current assets are licensed stock and interim.** Envato Elements, certificate `XBWSU8MTKJ`, non-exclusive and revocable. Keep them out of anything durable — no long-shelf-life print, no merchandise, nothing embedded in a trademark filing. The table above doubles as the commissioning brief.

› partner-logos

05 Partner logos PROVISIONAL

Every partner mark is governed by its owner's guidelines, not by this document. Meko's rules sit on top of theirs, never instead of them.

SUPPORTED

Claude Cursor Codex

MARKED COMING SOON

CrewAI LangChain OpenAI Agents SDK Lyzr Arcade AgentCore

Source files	The partner's official asset from their own brand page. Never traced, recoloured, or rebuilt from a screenshot.
Colour	Partner marks keep their own colour. Never forced into the Meko palette. An officially provided monochrome set may be used across a row of marks.
Sizing	Optically balanced, not mathematically equal. Match apparent weight, not bounding box.
Clear space	Whichever is larger: the partner's stated clear space, or Meko's.
Relationship	Partner marks indicate interoperability only. Never arranged to imply endorsement, partnership or joint ownership without a written agreement.
Never	Lock a partner mark to the Meko logo. Place one inside the endorsement. Animate or distort one.

> **Two open items.** "Coming soon" claims need a named internal approver — they carry marketing and legal exposure. And trademark use must be confirmed per partner; several require attribution language or restrict marketing use entirely. Provisional until that audit exists.

06 Motion STUB

Motion exists in the brand but has never been specified. What follows is a starting position, not a standard.

WHAT EXISTS TODAY

Homepage hero	`meko-data-hero.mp4`
Menu icons	Gradient SVGs for Discord and GitHub
Implied	The fluid textures read as frozen frames of motion

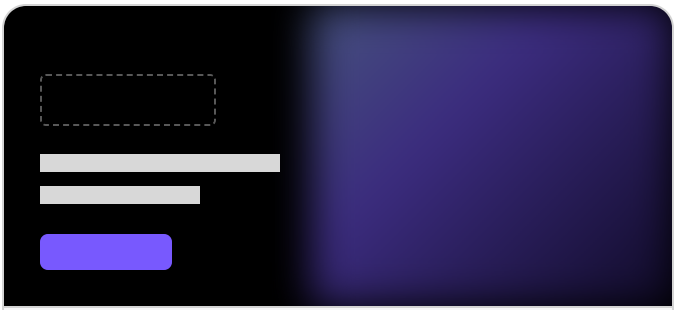

PROPOSED PRINCIPLES

Character	Fluid and continuous — context accumulating, moving, settling. Eased, never linear. No bounce, no overshoot, no elastic.
Direction	Follow the 135° gradient axis where a direction is needed.
Duration	Interface feedback under 200 ms. Transitions 200–400 ms. Ambient loops slow enough not to draw the eye.
Machine voice	Typed and terminal-like — cursor, prompt, text returning. The one place a mechanical rhythm is correct.
Accessibility	Everything ambient or decorative respects `prefers-reduced-motion`. Non-negotiable.

> **Needed before this is real:** whether motion is a brand system or a per-project treatment; easing curves as actual values; whether the hero video is reusable or one-off; and a spec for the product UI, which has none.

07 Applications

How the system resolves on the surfaces that exist today. Dashed boxes mark where supplied logo files are placed.

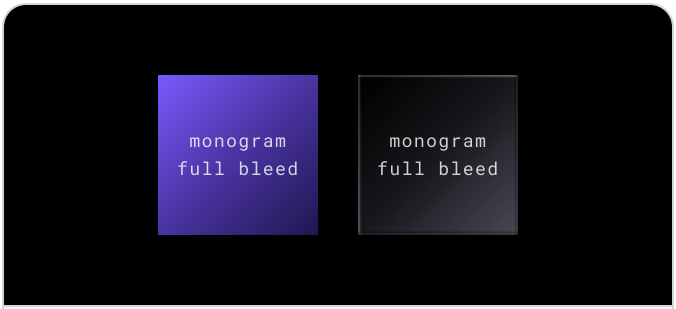

Website hero

Logo in the clear left zone. Purple for the primary action.

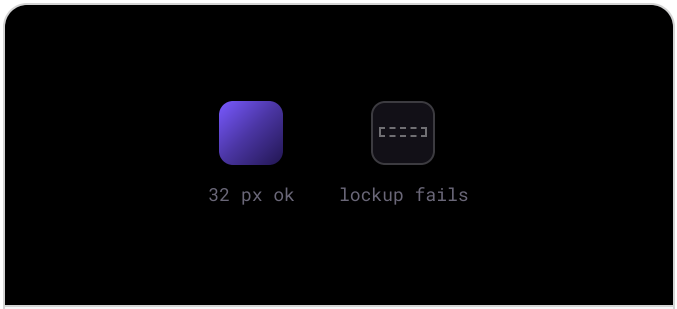

Blog banner

`#121017` card, headline in the machine voice.

App icon and favicon

Monogram, 135° gradient, no baked-in radius.

Social avatar

Monogram. Test at 32 px; the endorsement fails there.

Docs and product UI

Inter, mono for endpoints, purple links. Flat values only.

endorsed lockup

45 mm minimum

Stickers and print

300 dpi with bleed. Re-test purple after CMYK.

08 Do’s and don’ts

Every item below is a mistake that has already been made, or is one step away from being made.

DO

Place the supplied logo files.

DON’T

Retype “meko” in Bloka. The wordmark is custom lettering and will look almost, but not quite, right.

DO

Use green on black or `#121017`, in mono type only.

DON’T

Put green on white (1.82:1) or on purple (3.56:1). No size or weight fixes it.

DO

Treat orange as YugabyteDB’s, appearing only inside the endorsement.

DON’T

Use orange as a Meko accent, button, link or highlight because a layout wants warmth.

DO

Reserve gradients for icons, grounds and key art.

DON’T

Gradient the buttons, cards, borders or body text.

DO

Drop to the monogram below 180 px or 45 mm.

DON’T

Shrink the endorsed lockup until “By yugabyteDB” turns to mush.

DO

Write in sentence case, everywhere.

DON’T

Title Case Every Word Including Articles. And never “Chatgpt”.

DO

Attach a workload and a source to any performance number.

DON'T

Publish an unvalidated multiple. The 15× token claim is withdrawn and must not be reused.

09 Assets and contacts

What exists, what's missing, and who to ask.

INVENTORY

ASSET	FORMAT	STATUS
Endorsed lockup, light and dark	SVG	AVAILABLE
Mono lockup, black and white	SVG	AVAILABLE
App icon, purple and black	PNG 1024	AVAILABLE
Monogram, vector	SVG	NEEDED
Monogram, transparent	PNG / SVG	NEEDED
Monogram, flat one-colour	SVG ×2	NEEDED
Fluid textures	JPG	INTERIM – LICENSED STOCK
Commissioned texture	–	PLANNED
Bloka webfont	WOFF2	LICENSED – CONFIRM AGENCY COVERAGE
Inter, Roboto Mono	WOFF2	OPEN LICENCE
Wordmark source file	AI / Glyphs	LOCATE AND ARCHIVE

LICENSING SUMMARY

ITEM	TERMS
Wordmark and monogram	Custom lettering. Proprietary. Confirm IP was assigned rather than licensed.
Bloka	Commercial licence, titles only. Logo use not applicable. Confirm whether contracted agencies are covered or must licence separately.
Inter	SIL Open Font Licence. No restriction.
Roboto Mono	Apache 2.0. No restriction.
Fluid textures	Envato Elements, cert `XBWSU8MTKJ`. Non-exclusive, revocable. Licensed to an individual, not the company.

CONTACTS

AREA	OWNER
Brand and creative approvals	`[name, email]`
Asset requests and source files	`[name, email]`
Font licensing	`[name, email]`
Product and technical claims sign-off	`[name, email]`
Partner and trademark questions	`[name, email]`

APPROVAL WORKFLOW

Anything carrying the logo, a performance claim, or a partner mark needs sign-off before publication. Name the approver and the turnaround here, or the agency will assume neither exists.

`Turnaround: [x business days] · Escalation: [name]`

Version 0.2 — internal review draft. Sections 5 and 6 are provisional and marked as such. Positioning and voice are documented separately.

This document follows its own rules: pure black canvas, `#121017` panels, purple as the only chromatic primary, green restricted to mono machine-voice elements, orange appearing solely in the endorsement and the don’t markers, and one gradient on one expressive surface.
